

## CRITERIA FOR PLOWING OF PRIVATE WAYS

1. All speed bumps must be removed;
2. Any and all obstacles at the side of a road (i.e. brush, trees, basketball nets, bicycle racks, etc.) must be cleared to allow 2 – 4 feet of space to push snow;
3. Potholes must be filled/repaired;
4. Overhanging branches and limbs must be cleared to a height of 13 – 15 feet to prevent damage to our vehicles; and
5. Roads must have sufficient space to allow for the turnaround of our vehicles (we will **NOT** back out of a private way nor will our equipment back into a private driveway for the purposes of turning around).

Residents of private ways **MUST OPT-IN** prior to the Town entering upon their private property to remove snow. We need to be notified no later than October 16, 2015.

To accomplish this, we should receive a written communication from Road Trusts, Neighborhood Associations, or some such other similar group with the authority to make the request. If there is no such organization in a particular neighborhood, residents can poll their neighbors and notify us that the majority of its residents has expressed their desire to participate.
